> Mr. Cummins,
>
> Today I write to you in great sadness and misunderstanding. I wrote in 1997 as a 3rd grader "to whom it may concern" regarding the Landfill and what harmful things may go into it, how crazy i thought it was that someone along the way gave to go ahead to build this facility directly across from the School i would eventually attend. To beat it all, my community would soon build another school across from this property! Someone should have known better, but the reality is I live in a very poor community, the land that new School was built on is the only land that our school system owns.
>
> Being poor. What exactly does that mean to you? Probably nothing. I have a strong feeling that this is one of the main reasons that you are choosing to sweep the dumping of TENORM (or whatever it is that has refused to be identified officially) into our landfill so casually under the rug. You may not care about me, us or more importantly our community as a whole. That is where we are likely different, this community cares. We care about our families, our friends, our neighbors and our future! Our future that is currently sitting in classrooms across from this landfill. From your report I get the feeling that you aren't exactly 100% sure what this stuff is, how it will effect us in 30, 50 or more importantly 2700 years or how much there even is. I will not agree to leave this issue for our future generations. I invite you to go fishing in the pond across from the Estill County High School. There you will find distorted wildlife, poor pitiful fish that got put into that pond not know they were being put into a toxic environment. You say that substances can't "leak" or "escape" this facility without being detected. I would like an explanation on how those fish became so warped if the landfill doesn't leak. The friends that live across from the landfill don't even grow their beautiful garden anymore because of that landfill, like the fish, they did not ask for this! Like the friends, we did not ask for this. This was ILLEGAL!
>
> I am insisting that the illegally dumped material be completely removed from the landfill.
>
> Thank you,
