Subject: Alternate for Corrective Action Plan in Estill County

Thank you for the opportunity to comment on Advanced Disposal's Corrective Action Plan.

I would like to see the Energy and Environment Cabinet require the landfill to remove all illegally dumped TENORM.

With every load that was brought in, Estill County's Community Host Agreement was broken. That agreement was drafted back in the 1990s specifically to keep such waste out of the landfill, but it was blatantly disregarded. Maybe the landfill didn't know, but they accepted it; therefore, they are accountable and should remove the waste entirely.

People in this area worry about their health, the long term effects of the radioactive waste on school children across the road, and their property values.

Again, please require the landfill to remove the waste while monitoring the leachate indefinitely. This is the only solution that will provide us peace of mind.

Thank you,

Lisa Bicknell,
Estill County resident
