Jeff,

I am a resident of Estill county and would like to voice my opinion as to Which Corrective Action Plan (CAP) I believe needs to be implemented. After a thorough review of the two alternatives I believe that the Second alternative plan is the correct action to take. The disposal site was never constructed to receive radioactive waste and therefore radioactive waste should not ever be stored there. Cost should not be a consideration. It would appear that money was the cause of this illegality and money should properly correct this dangerous public health issue. I am a voter and care deeply how this issue is handled.

Thank You,

Brian Shobe
