Dear Mr Cummins,

I would like express my concerns over the above issue. I live within sight, approximately 3/10 mile, of the landfill. I under no circumstance want this material to remain on site. The regulations in place are there to protect me, my family and neighbors. Cost is a non-issue to me. We are talking about a billion dollar company. A few million dollars is nothing compared to the peace of mind for me and my descendants. There are facilities designed for this and that's where it should be. Please think of your family and friends. How would you feel if your grandchildren were going to school across the street from that. Please don't let us be stomped on by a company as large as Blue Ridge over a few million dollars. I trust that you'll do the right thing.

Thank you for your time,

Willis R Estes
