

An old legend says pearls were formed when dewdrops filled with moonlight fell into the ocean and were swallowed by oysters.

11 To whom this may
concern,

I am a concerned citizen of Estill County in regards to the radioactive waste being dumped in the Estill County Landfill. It is very irresponsible of authorities to allow the radioactive waste to be dumped into the landfill. Especially when the landfill is right across the road from the middle school and high school students and staff.

12 ~~When the waste was placed~~
~~in the landfill~~
The radioactive waste back in 2005 was a huge mistake that put Estill County in an unfair and unsafe situation. This illegal act needs to be taken care of to protect the citizens of Estill County.

In the Middle Ages, opal was thought to render the wearer invisible; thus it was recommended for thieves to wear opals.

31 If this radioactive

waste is not moved to a safer location, this is just putting Estill County citizens health at risk. The right thing to do and the moral thing to do is to move this waste by the proper authorities. To keep it here would increase children's cancer risk and also younger adult and older adult cancer risk.

What this company denied in court was wrong and immoral.

~~It is my hope and~~
I hope and pray to God this waste is safely removed away from our landfill. Something should be done to move this waste safely out of the landfill. Our drinking water would not be safe if this waste is kept here.
