This comment is related to an article which appeared on WLEX.com regarding TENORM which was illegally dumped in the Blue Ridge Landfill in 2015.

It is important to carefully weigh the long-term effect of leaving the TENORM vs short term effect of removing it, below are my views.

1. The illegally dumped TENORM should be removed and disposed outside of KY.
2. The landfill should NOT be given permission to accept radioactive waste after breaking the law.
3. KY citizens do not want radioactive waste in its state. There is already the disaster of Maxi Flats. Now there is another to add. This is disheartening and disgraceful.

Please see reference below.

Thank you.
