Jeri,

I don't mind moving our meeting to a later date. I'm pretty much booked up until Friday. How about meeting at 10:00 on Friday?

Nancy;

When we planned on the conference call on Tuesday, I didn't realize I was scheduled for a meeting in Bowling Green on Tuesday. Also the meeting we had scheduled with the Department of Public Health, Radiation Materials Section to discuss the landfill contamination from the waste received from Fairmont Brine Processing has been postponed to a later to date.

If it is convenient with you and Jeri, could we meet on another day this week (any day but Tuesday).

Thank you for reviewing the documents and helping us to learn how the waste streams from Fairmont Brine are regulated in relationship to RCRA.

Thanks again for your assistance and guidance,

George

George and Jeri,

I received your email and documents. I'll take a look at them and then we can meet tomorrow (Tuesday) at 11:00, as discussed.

Subject: RE: RCRA Question & Fairmont Brine Disposal

Hello Nancy;

Thank you for taking with us regarding the RCRA regulations and how they may apply to a waste that was received by a landfill in Kentucky from Fairmont Brine Processing in WV.

Please find attached the following documents:

- **Waste Profile Sheet and Approval Review Form from Advanced Disposal for the waste shipments they received from Fairmont Brine Processing. Also attached is the "Detailed Customer Activity Report" provided by the landfill manager that confirms receipt of 47 shipments between July 24, 2015 and November 16, 2015. The Blue Ridge Landfill in Irvine, Kentucky that received this waste is managed by Advanced Disposal.**
- **Correspondence to the "West Virginia Office of Environmental Health Services" from Fairmont Brine Processing describing how they planned to dispose of the waste.**
- **Analytical results obtained by Pace Analytical on behalf of Waste Management who was initially being considered to contract for disposal of this waste.**
- **Web Site pages for Advanced TENORM Services advertising their capabilities/expertise in the management of TENORM related wastes. Also attached are their records of incorporation as an LLC here in Kentucky.**

Thanks again for reviewing these documents and helping us understand how EPA regulates wastes from companies such as Fairmont Brine Processing.

We look forward to talking with you again next week.

Thanks again for your assistance!

Sincerely,

George
