Chris:

Tomorrow at 9 AM will be great! Please let me know the conference room or where I need to go. Also I assume I will be meeting you at the street office below. This will be my first visit to you offices.

Thank you,

George

Subject: RE: Advanced TENORM Services

Chris;

I have meetings scheduled as follows on Tuesday and Thursday:

- Tuesday 12-4
- Thursday 1-5

I am available the balance of the time on Tuesday and Thursday.

Wednesday, George Weems, the Field Inspector that is responsible for Blue Ridge Landfill and I plan to make a site visit to the landfill and would like very much if you could join us on that date. This is the landfill that received the waste from Fairmont Brine in WV that has elevated levels of radioactivity for TENORM present. I also understand there is a school across from the entrance to the landfill. This will be my first site visit there.

If at all possible it would be great if you are someone in your group could join us and check the area for radioactivity, especially around the solidification pit, etc. – and also be part the meetings with landfill officials. They are asking a lot of questions about TENORM and it would be helpful to have you there with your expertise.

Let us know if you can join us on Wednesday. George Weems wants to leave from the Lexington area around 7:30 and I will be leaving prior to that from Frankfort to meet up with him. If this doesn't work with your schedule, I will seek to coordinate a day and time with him that works for us all.

This situation with TENORM is my highest priority and any meetings and site visits will take precedence over meetings to discuss projects.

I look forward to us reviewing our findings and discussing the course of actions that can potentially be taken.

Thanks again for being so generous with your time and all the helpful information you have shared with me.

George

Subject: Advanced TENORM Services

George,

I wanted to let you know that I have received your emails and to see if you would be available for a meeting Tuesday, Wednesday or Thursday next week in order to discuss our findings and possible actions that will be taken.
